OUR STORY

NANOTECH, Inc. was established in 1980 as commercial kitchen appliance specialist and developed into a more specialized roasting and grilling product company using eco-friendly methods and technology.

NANOTECH, Inc. was formed with a great ambition, "Cleaner Earth, Every Day."

With 7 years of countless efforts and devotions, we invented the Nano WellBeing Grill, the only UL approved grill that does not create carbon monoxide and carbon dioxide.

nanowellbeing Nano WellBeing Grills are much more economical than using charcoal grill products. One of the features of our grills is smoke absorption. The grill absorbs the smoke through the smoke inlet mounted on the roaster in which the roaster itself extinguishes the smoke inside the roaster. This way, duct installation isn't necessary and makes our products cost-effective for restaurant business owners.

We will continue to do our best contributing to our customers and society and to continue research and development of energy-saving and environment-friendly products to become a company that our consumers can trust.

COMMERCIAL COOKING APPLIANCE

NANO GRILL F2

SAVE ENERGY & COST

We will continue research and development of energy-saving, environment-friendly products to high oil prices. Nano Well-Being grills remove the smoke through the intake. There is no need an internal ductwork.

CLEAN & ODORLESS ENVIRONMENT and ECO-FRIENDLY PRODUCTS

To all business owners, health is also a very important factor. We provide products that prevent tar and fumes and create an eco-friendly environment. Our grills don't use charcoal in order to maintain clean air without smoke.

NO MORE SMOKE & CHARRED MEAT

Juicy and Savory Flavors
Infra-red is stronger than charcoal so it has a feature to naturally sterilize and deodorize. The grill preserves the taste without drying out the meat while cooking the inside and outside at the same time.

UL LISTED CERTIFIED

This product is Listed by UL. Representative samples of this product have been evaluated by UL and meet applicable safety standards.

THERMAL SENSOR TEMPERATURE DISPLAY

Automatic Sensor! Automatic 60-minute Timer Application! The temperature display allows comfort and is easily detachable for wash. No need to manually control between high, medium, and low heat. The sensor automatically switches back and forth between medium and high heat.
